

Ways to help make the moments after an accident less traumatic and the insurance claims process a whole lot smoother.

## What to DO

Stop.

Move to a safe area.  
(if you can)

Check on others involved.

Call the police and report  
the accident.

Gather info and take  
photos of the accident scene.

File an insurance claim.

## What NOT to do:

Don't admit responsibility  
for the accident.

Don't ever leave the scene  
of the accident.

Don't sign anything.

Don't lose your cool.

Contact your auto insurance company as soon as possible after your accident. If you aren't sure who to call, check your insurance ID card for your insurer's contact information.
